

UP Open University • Faculty of Management and Development Studies **DOCTOR IN SUSTAINABILITY**

The Doctor in Sustainability (DSus) is a professional doctorate program that aims to produce graduates who can develop research-based solutions to persistent sustainability challenges. It will address the need for professionals with advanced academic training who are expected to develop transformative research approaches to address wicked problems based on practical issues in their profession.

The DSus will marry the theoretical frameworks from academic community and the practical knowledge and experiences. By providing a shared learning environment for the practitioners and academics working on sustainability, this program shall allow for co-design and co-creation of knowledge that promotes partnerships and collaborative action not only in academic courses but also in actual application in the field through their dissertation.

Program Goals

The Doctor in Sustainability program aims to develop graduates who are able to:

- Demonstrate highly advanced systematic knowledge and skills in highly specialized and/or complex interdisciplinary or multidisciplinary field of learning;
- Utilize of complex research/creative work and/or professional practice and/or the advancement of learning with full independence in individual work and/or in teams of interdisciplinary or multidisciplinary setting;
- Apply a more complex setting that demands leadership in research and creative work with strategic value added; and
- Apply a significant level of expertise-based autonomy and accountability to professional leadership for innovation, research, and/or development management in highly specialized or interdisciplinary or multidisciplinary fields.
- Evaluate the complexity of sustainability issues and challenges in institutional, local, national, regional and global settings from the lenses of sustainability concepts and frameworks;
